EARTH (COSMOSET)

IV. That which is commonly described to **be** the Coldest, Thickest,*Heaviest, of any of those Bodies counted Elements, is called EARTH, Land, Mold.

This is distinguishable by its

- Smaller Particles;
 - Alone and without mixture.
 - DUST.
 - Mixed with **Water**.
 - DURT, Mud, Mire, daggle, puddle:
 - Separated by **Fire**, || descending, or ascending.
 - ASHES, Embers, Cinders.
 - SOOT, Fuliginous.
- Bigger Masses of it, serviceable for building, and of a
 - Cold, clammy consistence, to which that common mixture which is made of this may **be** adjoined for its affinity.
 - CLAY.
 - MORTAR, Lome.
 - Hot and dry consistence, usually made of burnt **Stone**; to which, for the same reason, may **be** adjoined that other common mixture made of this.
 - LIME.
 - PLASTER, Parget, Tarras, daube.

ETYMOLOGY

The modern English word **Earth** developed, via Middle English, from **an** Old English **noun** most often spelled eorðe. It has cognates in every Germanic **language**, and their ancestral root has **been** reconstructed as *erþō. In its earliest attestation, the word eorðe was already being used to translate the many senses of Latin terra and Greek γῆ gē: the ground, its soil, dry land, the **human** world, the surface of the world (including the sea), and the globe itself. As with Roman Terra/Tellūs and Greek Gaia, **Earth** may have **been** a personified goddess in Germanic paganism: late Norse mythology included Jörð ('**Earth**'), a giantess often given as the mother of Thor.
