  - Separated by [Fire](#), || descending, or ascending.
    - ASHES, Embers, Cinders.
    - SOOT, Fuliginous.
- Bigger Masses of it, serviceable for building, and of a
  - Cold, clammy consistence, to which that common mixture which is made of this may [be](#) adjoined for its affinity.
    - CLAY.
    - MORTAR, Lome.
  - Hot and dry consistence, usually made of burnt [Stone](#); to which, for the same reason, may [be](#) adjoined that other common mixture made of this.
    - LIME.
    - PLASTER, Parget, Tarras, daube.

## ETYMOLOGY

The modern English word [Earth](#) developed, via Middle English, from [an](#) Old English [noun](#) most often spelled eorðe. It has cognates in every Germanic [language](#), and their ancestral root has [been](#) reconstructed as \*erþō. In its earliest attestation, the word eorðe was already being used to translate the many senses of Latin terra and Greek γῆ gē: the ground, its soil, dry land, the [human](#) world, the

surface of the world (including the sea), and the globe itself. As with Roman Terra/Tellūs and Greek Gaia, **Earth** may have **been** a personified goddess in Germanic paganism: late Norse mythology included Jörð ('Earth'), a giantess often given as the mother of Thor.
